STATE CENTRAL BANK  
PENSION COMMON TRUST FUND

The State Central Bank Trust Department manages a fund available to qualified retirement plan participants called the Pension Common Trust Fund. The fund's objective and strategy is one of seeking long term capital growth by investing in a portfolio of domestic and international stocks. The fund manager may also select investments in stock mutual funds and fixed income securities.

The attached Morningstar.com™ report describes the type and diversification of the publicly traded assets in the portfolio and the risk characteristics of that portion of the portfolio. The cash reflected on the attached report is held in a temporary cash management account that pays a rate of interest that is set each month using commercial paper rates derived from data supplied by the Depository Trust and Clearing Corporation.

William Logan, Chairman of the Board of State Central Bank, managed the fund beginning with its inception in 1992 through 2007. It is currently managed by Tyler Logan, Trust Officer of State Central Bank and reviewed each month by the Directors Trust Committee. State Central Bank has been in continuous operation for over 150 years. The bank is headquartered in Bonaparte and has branches in Farmington and Stockport, and its Trust Department serves all those locations. The Pension Common Trust Fund is not FDIC insured.

The annual performance of the Pension Common Trust Fund on the table below is calculated by subtracting the previous year's unit price (i.e. 2016) from the latest year's unit price (i.e. 2017) and divides that result by the previous year's unit price (i.e. 2016) to calculate the return for each year. The annual returns are then averaged for the most current 3, 5 and 10 year periods.

The Pension Common Trust Fund Performance on the table below is net of plan level expenses. As of September 30th, 2017, year to date plan expenses were: .54% of the total value of the Pension Common Trust Fund. Plan level expenses are transaction fees which include brokerage commissions and audit fees from third parties which are charged at cost to the fund and charged against participants' accounts. State Central Bank does not charge the Pension Common Trust Fund any fees.

The performance information provided presents returns over time. The performance information represents past performance and cannot guarantee future results. Current performance may be lower or higher than the performance shown. Investment return and principal value will fluctuate. An investor's shares, when redeemed, may be worth more or less than their original purchase price.

Participant investments and redemptions in the Pension Common Trust Fund are transacted at month end rather than on a daily basis. Pension Common Trust Fund performance calculations

include the reinvestment of dividends and capital gain. For the period ending September 30, 2017, the rate of turnover of assets in the Pension Common Trust Fund portfolio was: 2.71%. That rate was calculated by dividing the total net proceeds of assets sold during the year by an average fair market value of the fund over the course of that year.

	<u>Pension Common Trust Fund</u>
Current YTD Rate of Return As of 09/30/2017:	3.82%

The Pension Common Trust Fund is not designed or managed to be compared to a specific benchmark and no comparable funds, benchmarks or indices have been identified which have similar investment strategies and asset compositions. The investment manager sometimes compares the performance of the publicly traded portion of the Pension Common Trust Fund portfolio to that of other benchmarks on indices such as those listed below. The performance

calculations below were obtained from the Wall Street Journal. The formulas used to calculate performance were not disclosed in that report. State Central Bank did not perform the performance calculations listed below except to calculate a simple average for the five and ten year calendar year performance returns found in that report.

	<u>S&amp;P 500</u>	<u>NASDAQ</u>
CALENDAR YEAR RATE OF RETURN		
1 year return (2016)	12%	8.9%
AVERAGE RATE OF RETURN		
3 year average return	7.25%	7.01%
5 year average return	12.95%	15.05%
10 year average return	6.67%	10.44%

Show Short Position

Learn more about asset allocation

Your portfolio is aggressive. An asset mix such as yours normally generates high long-term returns but can be very volatile. Financial planners typically recommend these types of mixes for investors who have investment horizons longer than 10 years, need high returns, and are comfortable with a high level of risk.

Stock Style Diversification | Holdings Detail

	Your Portfolio (%)	Wilshire 5000 (%)
Large Cap Value	<b>32.12</b>	38.94
Large Cap Growth	<b>9.46</b>	34.72
Mid/Small Value	<b>37.20</b>	13.34
Mid/Small Growth	<b>21.24</b>	13.00

Your overall portfolio style: **Unclassified**

Your portfolio doesn't have a clearly discernible style and isn't well diversified among the main areas of the style box. Depending on your investment goals, you may want to further diversify our portfolio by increasing your exposure to large-cap growth stocks.

You have a Unclassified portfolio. Compared with the S&P 500:

◆ You have a lot of exposure to sectors marked by this icon. You should take special note of your large position in healthcare stocks. Healthcare issues generally offer good growth potential but come with a lot of risk. Keep in mind that many companies in this area face long, expensive product-development cycles and significant regulatory challenges. Also, the prices of these stocks tend to move together.
