
STATE CENTRAL BANK
PENSION COMMON TRUST FUND

The State Central Bank Trust Department manages a fund available to qualified retirement plan participants called the Pension Common Trust Fund. The fund's objective and strategy is one of seeking long term capital growth by investing in a portfolio of domestic and international stocks. The fund manager may also select investments in stock mutual funds and fixed income securities.

The attached Morningstar.com™ report describes the type and diversification of the publicly traded assets in the portfolio and the risk characteristics of that portion of the portfolio. The cash reflected on the attached report is held in a temporary cash management account that pays a rate of interest that is set each month using commercial paper rates derived from data supplied by the Depository Trust and Clearing Corporation.

William Logan, Chairman of the Board of State Central Bank, managed the fund beginning with its inception in 1992 through 2007. It is currently managed by Tyler Logan, Trust Officer of State Central Bank and reviewed each month by the Directors Trust Committee. State Central Bank has been in continuous operation for over 150 years. The bank is headquartered in Bonaparte and has branches in Farmington, Stockport, and Dubuque and its Trust Department serves all those locations. The Pension Common Trust Fund is not FDIC insured.

The annual performance of the Pension Common Trust Fund on the table below is calculated by subtracting the previous year's unit price (i.e. 2015) from the latest year's unit price (i.e. 2016) and divides that result by the previous year's unit price (i.e. 2015) to calculate the return for each year. The annual returns are then averaged for the most current 3, 5 and 10 year periods.

The Pension Common Trust Fund Performance on the table below is net of plan level expenses. As of March 31st, 2016, year to date plan expenses were .02% of the total value of the Pension Common Trust Fund. Plan level expenses are transaction fees which include brokerage commissions and audit fees from third parties which are charged at cost to the fund and charged against participants' accounts. State Central Bank does not charge the Pension Common Trust Fund any fees.

The performance information provided presents returns over time. The performance information represents past performance and cannot guarantee future results. Current performance may be lower or higher than the performance shown. Investment return and principal value will fluctuate. An investor's shares, when redeemed, may be worth more or less than their original purchase price.

Participant investments and redemptions in the Pension Common Trust Fund are transacted at month end rather than on a daily basis. Pension Common Trust Fund performance calculations

include the reinvestment of dividends and capital gain. For the period ending March 31, 2016, the rate of turnover of assets in the Pension Common Trust Fund portfolio was 7.72%. That rate was calculated by dividing the total net proceeds of assets sold during the year by an average fair market value of the fund over the course of that year.

The Pension Common Trust Fund is not designed or managed to be compared to a specific benchmark and no comparable funds, benchmarks or indices have been identified which have

similar investment strategies and asset compositions. The investment manager sometimes compares the performance of the publicly traded portion of the Pension Common Trust Fund portfolio to that of other benchmarks on indices such as those listed below. The performance calculations below were obtained from the MorningStar Website. The formulas used to calculate performance were not disclosed in that report. State Central Bank did not perform the performance calculations listed below except to calculate a simple average for the five and ten year calendar year performance returns found in that report.

☐ Show Short Position

Learn more about asset allocation

Your portfolio is aggressive. An asset mix such as yours normally generates high long-term returns but can be very volatile. Financial planners typically recommend these types of mixes for investors who have investment horizons longer than 10 years, need high returns, and are comfortable with a high level of risk.

Stock Sector | Holdings Detail

	Portfolio (% of Stocks)	Mid/Small Cap (%)

Change Benchmark: S&P 500 similar investment style

You have a mid/small cap portfolio. Compared with a benchmark with a similar investment style:

You have a lot of exposure to sectors marked by this icon. You should take special note of your large stake in technology area. These stocks can turn in huge returns, but they are also very volatile and their prices tend to move together. Keep in mind that many younger companies in this area may not be profitable yet.

Stock Style Diversification | Holdings Detail

	Your Portfolio (%)	Wilshire 5000 (%)
Large Cap Value	22.55	37.30
Large Cap Growth	10.17	37.07
Mid/Small Value	37.34	13.07
Mid/Small Growth	29.93	12.56

Your overall portfolio style: **Mid/Small Cap**

Compared with the broader market, your portfolio's stock exposure is biased toward small- and mid-cap companies. Among these issues, it is worth noting that you have a healthy mix of conservatively priced value stocks and aggressively-priced growth issues. Depending on your investment goals, you may want to further diversify your portfolio by increasing your exposure to large-cap companies.

Stock Type | Holdings Detail

	Portfolio (% of Domestic Stocks)	Mid/Small Cap (%)

You have a lot of exposure to stock types marked by this icon.

You have very little exposure to types marked by this icon.

World Regions | Holdings Detail

◆ You have very little exposure to sectors marked by this icon. You should take special note of your low exposure to healthcare. While these stocks can be volatile, they are still an important component of the market and offer superior growth prospects. You should also look at your exposure to financial services. This sector represents a fairly large segment of the market, and you shouldn't neglect it without good reason.

	0-10	10-20	20-50	50-90	>90%
			Stock Exposure (%)	Foreign Stocks (%)	MSCI-EAFE (%)

Fees & Expenses | Holdings Detail

Average Mutual Fund Expense Ratio (%)	0.00
Expense Ratio of Similarly Weighted Hypothetical Portfolio (%)	0.00
Estimated Mutual Fund Expenses (\$)	0.00
Total Sales Charge Paid (\$)	5,021.54

Either you own no mutual funds or we do not have the data necessary to provide a written evaluation of the expense ratios of your holdings. You can still view detailed cost data on individual holdings, however.

You have a fairly healthy stake in foreign stocks. Comparing your exposure with a common international index:

◆ You have a lot of exposure to regions marked by this icon. You have extremely large positions in Latin America and Asia Emerging. This is very risky. While these have the potential to turn in high returns, they also carry special political, currency, and other risks.

◆ You have very little exposure to regions marked by this icon. Please note that you have a low weighting in Europe Developed, the largest region of the International market. Underweighting this region a little probably isn't a big deal, but you shouldn't neglect such a large and important region without good reason.
